

REST API with authentication using Spring Security + OAuth2 + JPA

1. No private resource:

2. Access private resource:

3. Request for Access Token:

localhost:8080/oauth/

http://localhost:8080/

+

...

No Environment

POST

localhost:8080/oauth/token?grant_type=password&username=user&password=user

Params

Send

Authorization

Headers (2)

Body

Pre-request Script

Tests

Type

Basic Auth

Clear

Username

my-trusted-client

The authorization header will be generated and added as a custom header

Password

secret

☐ Save helper data to request

☒ Show Password

Body
